

# **Bibliometric Evaluation of the FP-5 and -6 Results in the Czech Republic**

J. Vanecek & V. Albrecht  
Technology Centre AS CR  
Prague

## Subject of Evaluation

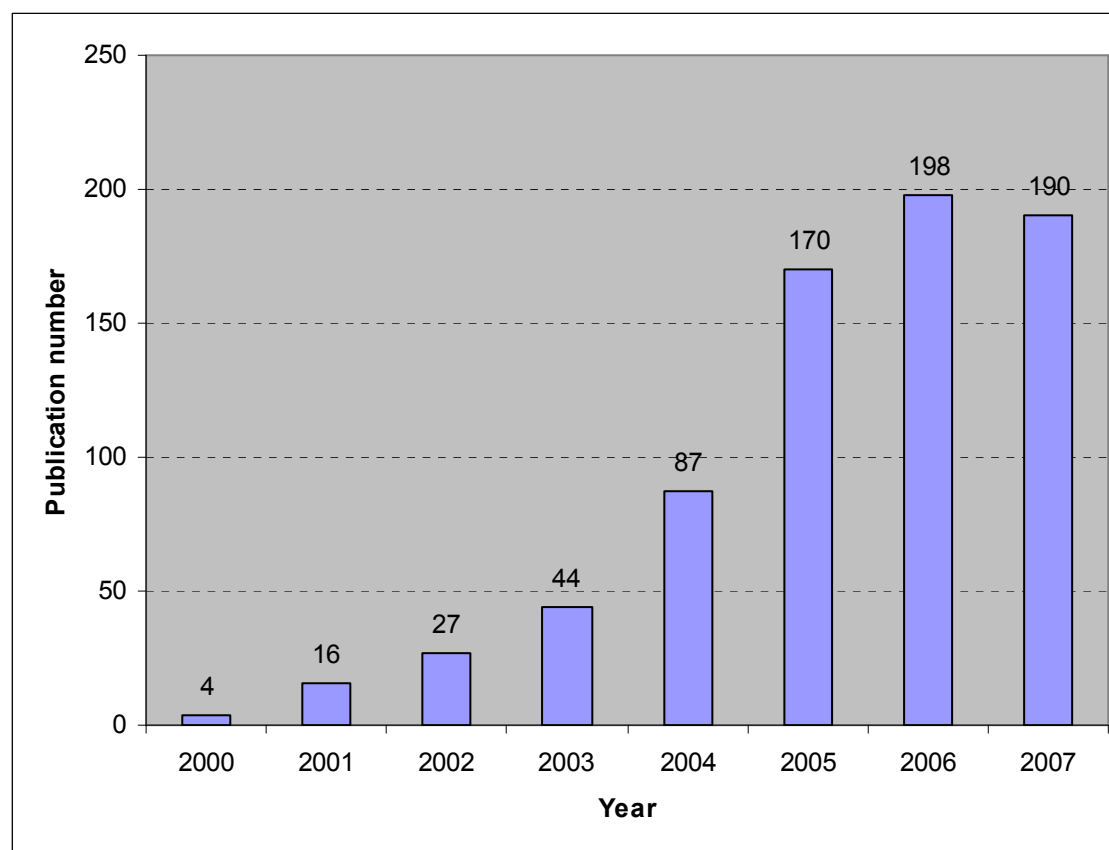

- Czech publications from years 2000 to 2007 resulting from (and assigned to) the 5<sup>th</sup> and 6<sup>th</sup> FP projects
- Comparison of the FP publications with the Czech standards in:
  - Number of international collaborations with EU-25 countries
  - Number of citations

## Entry Data

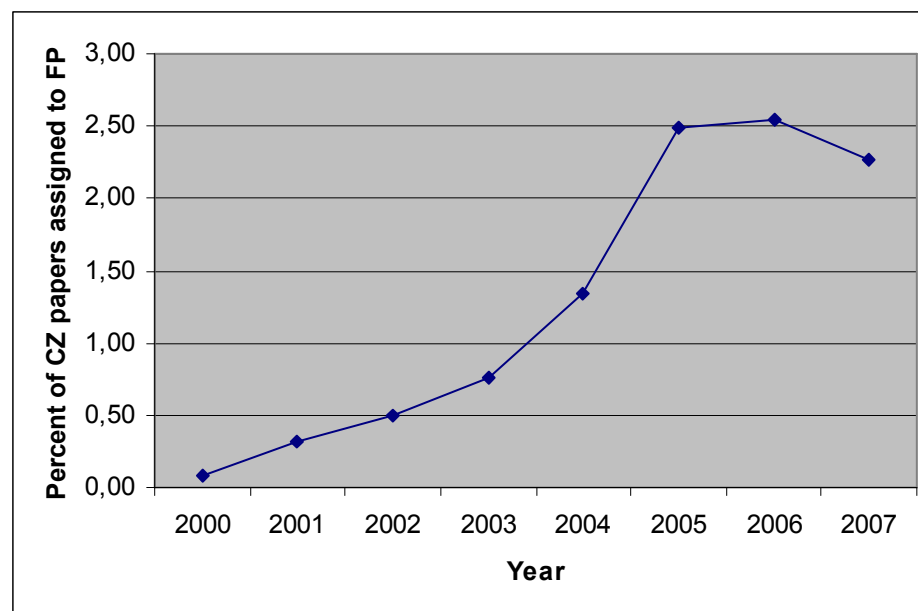

- Publications assigned to FP projects in the electronic repository of the AS CR (ASEP) – **1492 publications**
- Publications assigned to FP projects in the responses to our survey – **281 publications**
- From the total of **1773** FP publications only **736** were found in the Web of Science database
- All comparisons were done with these **736 publications**

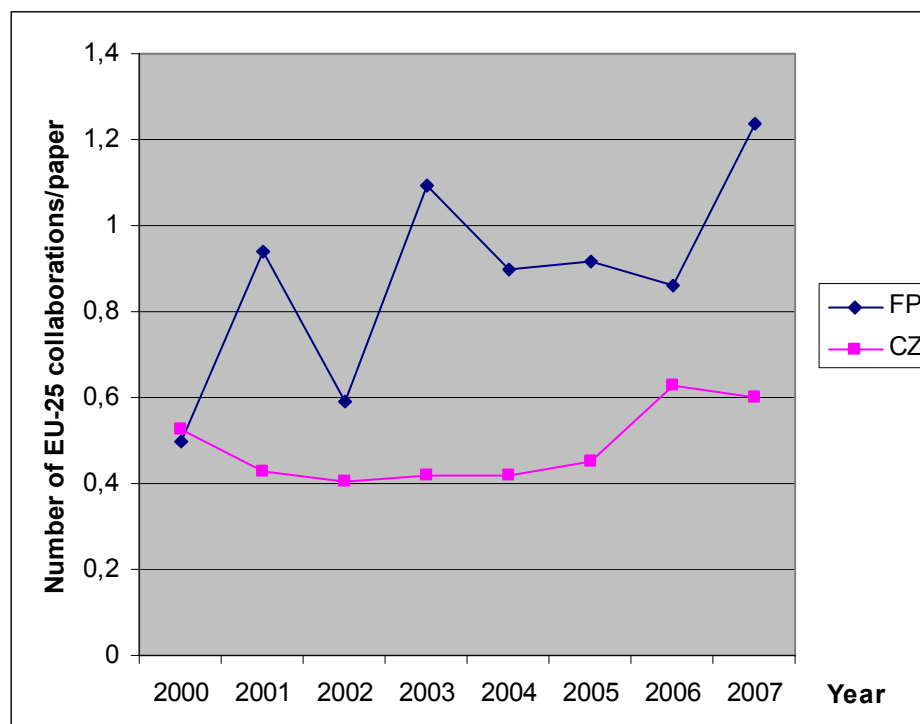

## Publications resulting from FP5 and FP6 projects

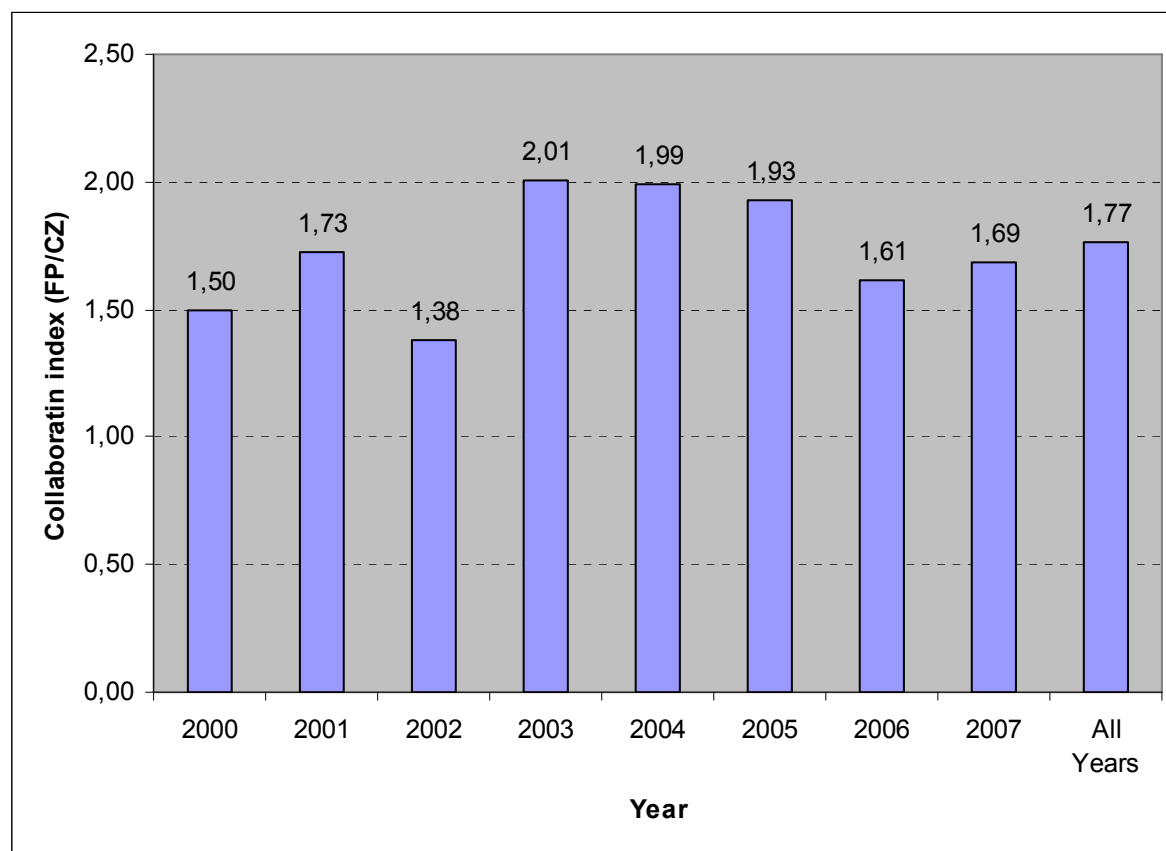

## Percent of the Czech papers assigned to FP

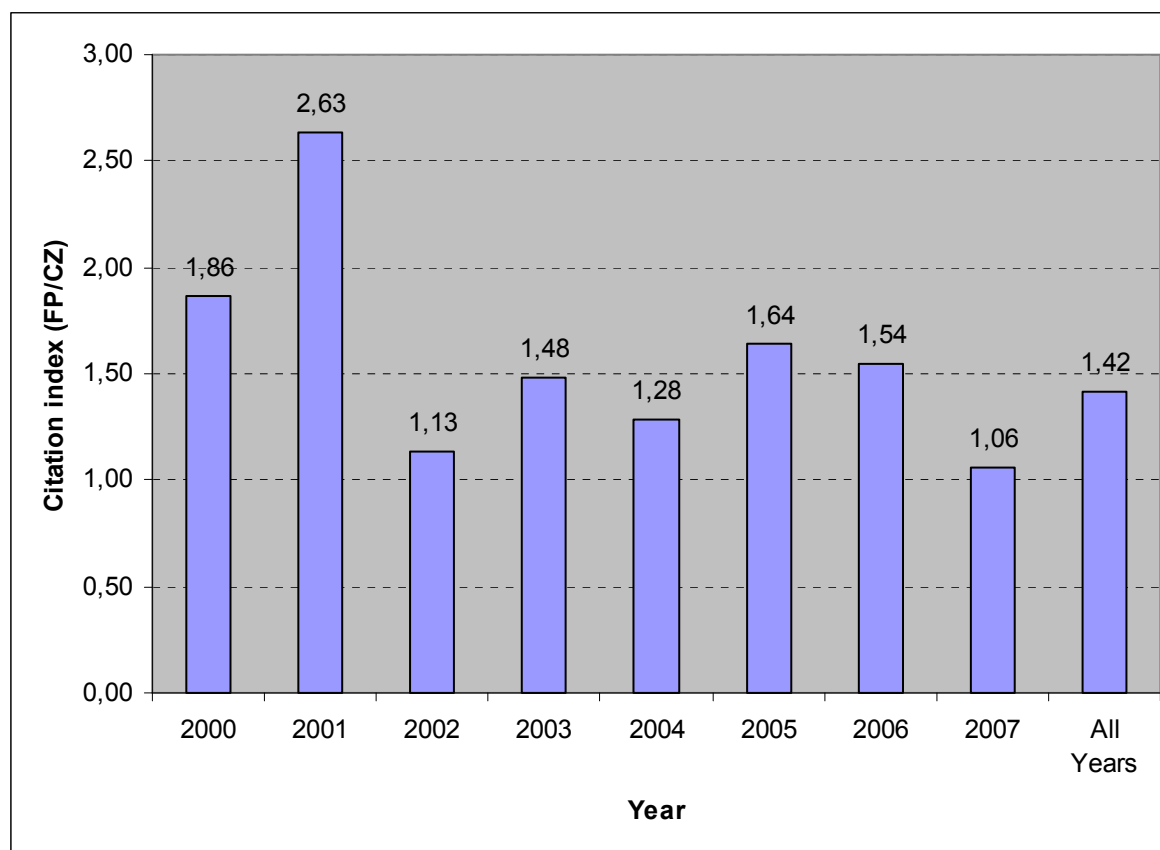

## Collaborations of the Czech researchers with EU-25 countries

## Collaborations of the Czech researchers with EU-25 countries

## Relative citation impact of the Czech publications resulting from FP projects

## Conclusions

- Only part of publications resulting from FP projects has been analyzed.
- These publications represented less than 2,5% of all Czech publications.
- In these publications the co-authors from EU-25 countries occurred almost 80% more frequently than in the average Czech papers.
- The publications resulting from FP projects were cited 42% more than the average Czech papers.
